R2>Chr Heads, Downregulated
protein maturation
response to endoplasmic reticulum stress
protein folding
Golgi vesicle transport
establishment of protein localization to membrane
lipid localization
protein targeting to ER
establishment of protein localization to endoplasmic reticulum
cellular response to unfolded protein
response to unfolded protein
protein N−linked glycosylation

SS02769>Chr Heads, Upregulated
small molecule catabolic process
small molecule biosynthetic process
cellular catabolic process
L−amino acid metabolic process
proteinogenic amino acid metabolic process
glucan metabolic process
ribose phosphate biosynthetic process
glycogen biosynthetic process
polysaccharide biosynthetic process
alpha−amino acid catabolic process
proteinogenic amino acid biosynthetic process
pentose−phosphate shunt
NADPH regeneration
NADP metabolic process
one−carbon metabolic process
