B
ER2>Chr Heads, Upregulated
rRNA metabolic process
rRNA processing
ribosome biogenesis
response to starvation
cellular response to endogenous stimulus
regulation of growth
cell growth
surface receptor protein tyrosine kinase sig. path.
insulin receptor signaling pathway
response to insulin
cellular response to hormone stimulus
response to hormone
multicellular organism growth
lymph gland development
positive regulation of multicellular organism growth

C
ER2>Chr Heads, Downregulated
protein maturation
response to endoplasmic reticulum stress
protein folding
Golgi vesicle transport
estab. of protein localization to membrane
lipid localization
protein targeting to ER
establishment of protein localization to ER
cellular response to unfolded protein
response to unfolded protein
protein N−linked glycosylation
